REASONS FOR ALLOWANCE

1. Claims 1-16 are currently allowed.

2. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach a broad-band plate antenna in which a single linear element portion and a slot element portion are integrally formed comprising

a) a one-end-open non-conductive surface, a linear element portion between the part of the outer perimeter and the one-end-open non-conductive surface, a closed rectangle shaped non-conductive surface is provided in the conductive substrate in parallel to said one-end-open non-conductive surface, so as to form a slot element portion and a non-conductive portion is provided in a feeding point forming conductive portion formed between the one-end-open non-conductive surface and the slot element portion, so as to use opposing ends of said non-conductive portion as a feeding point and a groundplate portion in the manner as defined in claims 1-8, or

a first one-end-open non-conductive surface, a first linear element portion, a second one-end-open non-conductive surface is provided in the conductive substrate in parallel to said first one-end-open non-conductive surface, so as to form a second linear element portion having a length longer than the first linear element portion between said second one-end-open non-conductive surface and the first one-end-open non-conductive surface, a third linear element portion, an area of a non-conductive portion between the second linear element portion and the groundplate portion is made larger, first and second feeding points, and a conductor portion connects the first linear element portion and the third linear element portion together in the manner as defined in claims 9-16.

3. Any comments considered necessary by applicant must be submitted no latter than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiry

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh Vo Dinh whose telephone number is (571) 272-1821. The examiner can normally be reached on Monday to Friday from 9:30AM to 6:00PM. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
